

BergXperience Newsletter

Spring 2025

Now, as the ski season is heading to its end, it is time for the spring newsletter of BergXperience!

Booking is still possible this summer

It is amazing how popular the Alta Via 1 is. In January of this year all huts in the northern part were already fully booked. Yes, it certainly is a beautiful route, but to be honest: everywhere in the Dolomites it is beautiful. Fortunately, there are still possibilities for the southern part of the Alta Via 1 and in and around [Val di Zoldo](#). In my opinion nicer than the northern part of the AV1 and also a lot quieter! View the offer [here](#).

What to bring on a hut to hut tour?

Many people who book a hut-to-hut tour with BergXperience do so for the first time. What to take with you, but above all: what not? After all, you will have to carry everything yourself all day, so pack light is the motto. BergXperience provides a [packing list](#) to help you pack the right things. Some things can be rented for a small amount at BergXperience, so you don't have to buy everything yourself right away. We can also help you if you are not sure what to take and what to leave behind.

DXT - Dolomiti Extreme Trail

Early June Val di Zoldo is the center of the annually held DXT, the Dolomiti Extreme Trail. A trail running event where the world's top are present for the distance of no less than 103 km! For recreational runners there are other distances: 72, 55, 35, 22 and 11 km.

Most guests of BergXperience are generally not trail runners, but parts of the routes of the DXT are offered by BergXperience as standard in the hikes [in and around the Val di Zoldo](#). So you can also do part of the DXT hiking.

Wellness skiing tour

One of the private skiing tours that BergXperience organized this year was a wellness tour. Not exactly a luxury trip, but in every rifugio where we spent the night it was possible to use a sauna and/or hot tub. The trip was a great success, so maybe an idea for next year? Book a [private skingtour](#) and indicate in the comments that you want wellness.

Pre-registration winter 2026

Although there has been little snow this winter, we have been able to make beautiful ski hut tours. The Italian snowmasters have elevated snowmaking and slope preparation to an art, so you can still ski on beautiful slopes throughout the whole season. And as all (sub-) areas of Dolomiti Superski area are quite high (above 1800 m), the slopes also remain good for a long time.

The offer for winter 2026 is not quite ready yet, but you can already [pre-register](#): then you will be the first to receive the offer of tours. If you also provide desired dates, we will try to take this into account while making the planning.

Olympic Games 2026

2026 is the year of the Winter Olympics. From February 6-22, Cortina d'Ampezzo, together with Milan, will host the Winter Games. What this will exactly mean for skiing in and around Cortina is not yet known, but BergXperience is anticipating to this by also organizing ski hut tours to other areas. The offer for winter 2026 is not quite ready yet, but you can already show your interest with a [pre-registration](#).
